INFO-NOTE #P1959

Subject: Change of Blister Tape Dimensions and Quantity per Reel for Type SMS-R000 (ZERO-Ohm Link, Jumper)

Dear Customer,

We would like to inform you about an upcoming change of the tape dimensions and quantity per reel for type SMS-R000.

Reason for Change:

The reason for this change is a short-term discontinuation by one of our tape-supplier. The supplier stops manufacturing of blister tapes and the present tape of type SMS-R000 is no longer available.

Due to this fact, we are forced to switch to an existing blister tape in our portfolio at short notice. However, this tape has slightly different dimensions and due to thicker material and deeper pockets, the number of components on the 13" reel changes from currently 11,000 to 9,000 pieces in future.

Material thickness of the tape and pocket depth will be changed. For details see page 2 and attached drawings. The new tape is already in use for our shunt type VMS.

Time Schedule:

We will switch to the new blister tape and reel quantity of 9,000 pcs. on 29th- April 2022. Otherwise, further delivery of type SMS-R000 is not possible.

Samples:

Samples with new blister tape are available on request.

Please note this change will have no impact on technical properties, performance and reliability of the product. Only component's packaging specification is affected. There will be no change of order code.

In case of questions or concerns, please do not hesitate to contact your sales support.

Thank you for your understanding on this matter.

Kind Regards

Change Management of

Isabellenhütte Heusler GmbH & Co. KG

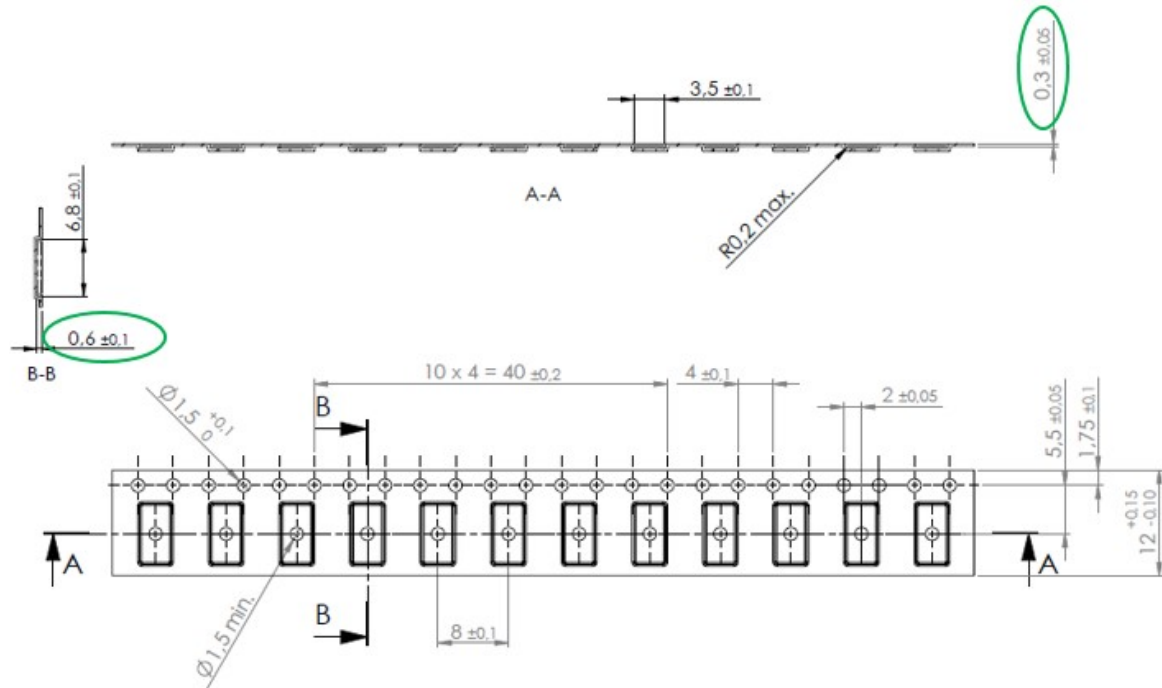

Change of Tape Dimensions in Detail

OLD Tape dimensions, according to drawing #Z-YD-655b:

Blister tape material thickness: 0.3mm (± 0.05)

Pocket depth: 0.6mm (± 0.1)

Quantity per Reel: 11,000 pcs.

NEW Tape dimensions, according to drawing #Z-YD-656:

Blister tape material thickness: 0.235mm (± 0.05)

Pocket depth: 0.7mm (± 0.1)

Quantity per Reel: 9,000 pcs.
