

REACH is the abbreviation for Registration, Evaluation, Authorisation and Restriction of Chemicals; a European Community regulation on chemicals and their safe use. The REACH regulation (EC) No.1907/2006 entered into force on 1<sup>st</sup> June 2007. The purpose is to ensure a high level of protection for human health and the environment.

As sales agents for electronic component manufacturers, Rhopoint Components is classified as an 'importer of articles', and therefore is liable for submitting information to its customers regarding the presence of substances in any of the supplied articles.

The registration of substances present in the articles imported by Rhopoint Components, if any, shall be performed by the manufacturer.

We maintain contact with the manufacturers to ensure that no listed (SVHC) materials are included in the products. Based upon this knowledge, we believe to the best of our ability that no substances from the ECHA [Candidate List](#) are included in supplied articles.

Should our articles contain (SVHC) materials in the future, we will aim to notify all of our customers in due course.

Signed on behalf of Rhopoint Components Ltd.

Adam Stanger

Group Quality Manager – Rhopoint Components Limited.
