Universal serial bus 2.0 and 3.0 (SuperSpeed); Type A connectors meet the requirements for high resistance and provide reliable connectivity.

- Up to 5000 plugging cycles
- THT, THR or SMD soldering processes
- Available in design types 180° (vertical/upright) or 90° (horizontal/flat-lying)
- Packed either in a tray (TY) or on a roll (tape-on-reel, RL)
- Reinforced gold layer for improved corrosion protection

General ordering data

Type	USB2.0A S1H 1.4N4 TY BK
Order No.	2563720000
Version	PCB plug-in connector, USB jacks, THT/THR solder connection, No. of poles: 4, 90°, Solder pin length (l): 1.4 mm, Gold over nickel, Black, Tray (manual assembly)
GTIN (EAN)	4050118572339
Qty.	100 pc(s).
Packaging	Tray (manual assembly)

Technical data

Dimensions and weights

Net weight	0.001 g

Temperatures

Operating temperature, max.	60 °C	Operating temperature, min.	-40 °C
Storage temperature, max.	60 °C	Storage temperature, min.	-40 °C

System specifications

LED	No	Mounting onto the PCB	THT/THR solder connection
No. of poles	4	Number of solder pins per pole	1
Outgoing elbow	90°	Packaging	Tray (manual assembly)
Plugging cycles	≥ 1500	Product family	OMNIMATE Data - USB jacks
Protection degree	IP20	Shield tabs	none
Shielding	Yes	Solder pin length (l)	1.4 mm
Transmission rate	480 Mbit/s	Type of connection	Socket
Withdrawal force per pole	10 N	push-in force/pole	35 N

Electrical properties

Dielectric strength, contact / contact	750 V AC	Insulation resistance	≥ 1000 MΩ
Rated current	1.5 A	Rated voltage	30 V

Material data

Insulating material	LCP	Colour	Black
Colour chart (similar)	RAL 9011	Insulating material group	II
CTI	≥ 500	Insulation resistance	≥ 1000 MΩ
Moisture Level (MSL)	1	UL 94 flammability rating	V-0
Contact base material	Phosphorus bronze	Contact surface	Gold over nickel
Layer structure of plug contact	30-80 µ" Ni / 30- µ" Au	Storage temperature, min.	-40 °C
Storage temperature, max.	60 °C	Operating temperature, min.	-40 °C
Operating temperature, max.	60 °C		

Classifications

eClass 6.2	27-25-05-04

Approvals

Approvals	UL LISTED
ROHS	Conform

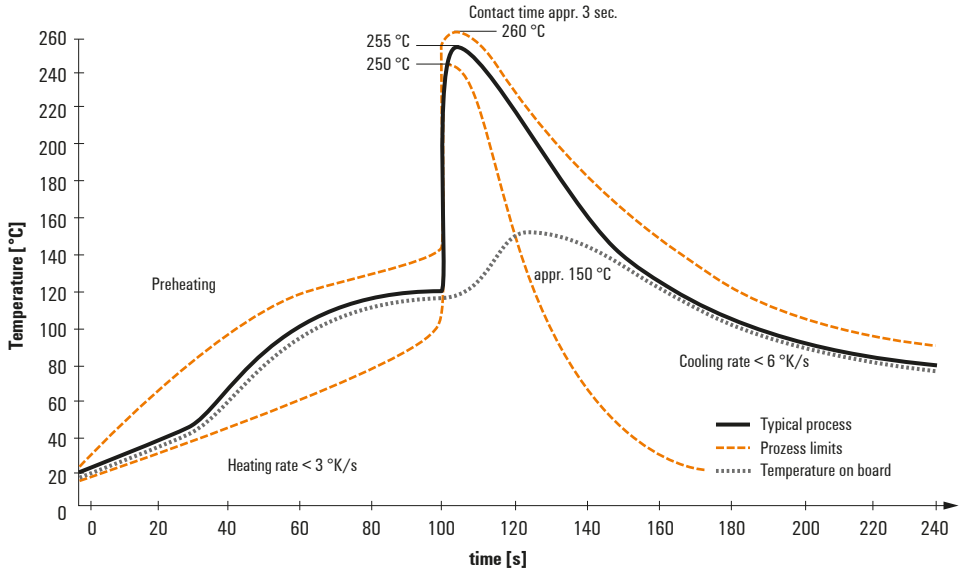
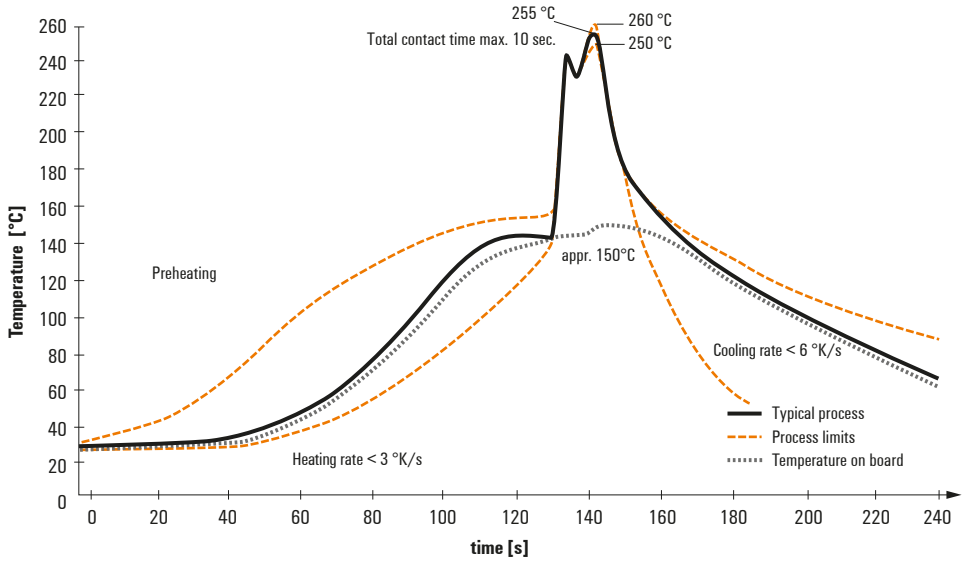
Single Wave:



Double Wave:



Wave soldering profiles

Wired connection elements should be processed in accordance with the DIN EN 61760-1 standard. We have included two recommendations for practical wave soldering profiles, with which Weidmüller PCB terminals and connectors are qualified.

When choosing a suitable profile for your application, the following factors also need to be considered:
- PCB thickness
- Proportion of Cu in the layers
- Single/double-sided assembly
- Product range
- Heating and cooling rates

The single and double wave profiles each indicate the recommended operating range, including the maximum soldering temperature of 260°C. In practice, the maximum soldering temperature is quite often well below the above maximum profile.

We reserve the right to make technical changes.

Reflow Solder Profile

Recommended reflow soldering profile

Reflow soldering profile

The perfect soldering profile for SMT Surface Mount Technology is one the most exiting question in SMT production. But there are more than one correct answer: The diagram of temperature-on-time is related to processing features of solder paste and to maximum load of components.

We have to consider the following parameters:
- Time for pre heating
- Maximum temperature
- Time above melting point
- Time for cooling
- Maximum heating rate
- Maximum cooling rate

We recommend a typical solder profile with associated process limits. With preheating components and board are prepared smoothly for the solder phase. Heating rate is typically ≤ +3K/s. In parallel the solder paste is ‚activated'. The time above melting point of 217°C the paste gets liquid and components and boards begin to connect. The maximum temperature of 245°C to 254°C should stay between 10 and 40 seconds. In the cooling phase at ≥ -6K/s solder is cured. Board and components cool down while avoiding cold cracks.

We reserve the right to make technical changes.
